

# Instructions for Recording with TalkingPEN Labels

① Hold down the POWER  button for a few seconds until the pen turns on (blue light).

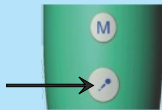

② Hold down the MODE  button until the light turns red. The pen is now in recording *mode*, but is not yet recording.

(the red mode is for making and playing back your own recorded content and the blue mode is for pre-recorded publications)

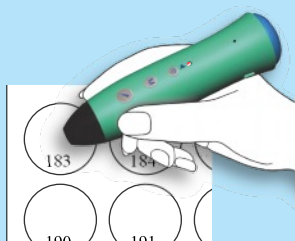

③ To start your recording, hold down the RECORD  button and touch a TalkingPEN label. The light will turn purple. You can now release the button and start your recording.

Once you have finished, press the  button once more to end the recording (the light will turn back to red).

⑤ To playback, simply touch the TalkingPEN label with the pen still in “record mode” (red light).

Students can re-record on the same label as many times as they like.

**Once you have used up “STUDENT SET 1”, please order “STUDENT SET 2”, then set 3, etc.**
